## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

During a telephone interview on April 26, 2011 with the applicant's attorney, Mr. Ronald Shore, the examiner stated that the distinction between Brumlik and the present invention is that the container in the present invention is blocking the penetrated holes of the film or membrane (shown in Fig. 2-3), while in Brumlik the electrolyte is allowed to flow through the penetrated holes, as shown in the figure with a pump drawing the electrolyte through the membrane. The amendment to claim 7 on April 27, 2011 has incorporated the limitation that the container is disposed over and blocking the bottom of the penetrated hole, thus the claims are now distinguished over Brumlik. It would not be obvious to block the holes in Brumlik, because Brumlik teaches using a pump to draw the electrolyte through the membrane, and thus blocking the holes would be contrary to the method of Brumlik.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
